### Preface Page

---

**Fiscal Year:** 2014

**Fiscal Year Quarter:** 1

**Status:** Draft

**Status Change Date:** 28 Feb 2011

**Training Location(s):** (052) Engineer School

**Specialty:** E12T10 Technical Engineer

**Supporting ITP:** 12T Technical Engineer

**TATS-Course:** Yes

**Purpose:** Provides training for Army, Air Force, Navy, and Marine Corps personnel with novice level knowledge of construction surveying and drafting; Army and Navy personnel with knowledge of materials quality testing; Army personnel with knowledge of geodetic surveying.

**Course Scope:** The 12T10 Technical Engineer Course is comprised of four phases encompassing five modules of MOS related training conducted at Fort Leonard Wood, MO. Phase 1 contains two modules; Drafting and Surveying. Phase 2 contains one module; Surveying. Phase 3 contains one module; Materials Testing. Phase 4 contains two modules; Geodetic and Airfield Surveying, and a Field Training Exercise (FTX).

- o PHASE 1: 160.0 academic hours of Computer Aided Drafting (CAD) that includes architectural graphics, architectural/utility drawings, civil drawings, and drawing production/reproduction; 94.2 hours of construction surveying that consists of differential leveling and establishing project control.
- o PHASE 2: 137.8 academic hours of construction surveying that includes construction site data collection, construction support surveying, and road, building, and utility stakeout using both optical and Global Positioning System (GPS) survey systems.
- o PHASE 2: 160.0 academic hours of soils and concrete testing that includes fresh and hardened concrete testing, laboratory soils testing, and field soils testing used for site evaluation, design, construction, and quality control/assurance of military construction operations.
- o PHASE 3: 96.0 academic hours of geodetic surveying that includes the use of geodetic survey software, airfield/heliport and navigational aid (NavAid) surveys, and installation and recovery of permanent survey control stations. A 72 hour Field Training Exercise (FTX) will be conducted to culminate all training received.

**Phase Scope:** Army, Navy, and Marine Corps personnel attend this phase. This phase provides training in construction surveying that includes construction site data collection, construction support surveying, and road, building, and utility stakeout using both optical and Global Positioning System (GPS) survey systems.

**Course Prerequisites:** Army, Navy, Air Force, and Marine Corps personnel must meet the prerequisites

**Course:** 413-12T10  
**Course Name:** Technical Engineer  
**Management Category:** Resident  
**Status:** Draft

**Version:** 1      **Delivery Group:** A      **Phase:** 2

**Lesson Title:** Perform a Preliminary Site Survey

**Action Text:** Perform a Preliminary Site Survey

**Condition:** In a field/classroom environment, given: an Automated Integrated Survey Instrument (AIS) with accessories, R8 GPS Survey System, FM 5-233, pencil, printer with paper, and a computer loaded with Terramodel and Trimble Business Center software.

**Standard:** Perform a preliminary site survey ensuring that enough survey data is acquired to fully depict all terrain features and manmade objects of a given area. Download the data to a computer loaded with Terramodel and make required adjustments to the file and plot the data.

**Remarks:** The following software will need to be downloaded prior to the instruction of this lesson.
